

AI & Automation Opportunity Briefing

A working session with your leadership team, framed around your own processes rather than a product. You leave with a ranked shortlist.

1 hour

RUN REMOTELY

No Cost

NO OBLIGATION

Ranked Shortlist

ACTIONS YOU CAN KEEP

"The board has asked what our AI plan is, and I don't have an answer I'd defend."

WHY THIS HAPPENS

Everyone is talking about AI. Nobody has told you which part applies to you or how.

Most of the noise is about capability. The question an executive has to answer is narrower: which processes, in what order, at what risk, and what will it cost.

WHAT TO EXPECT

Before, during and after

BEFORE

A few short questions when you book

Tell us about your business and systems, so we arrive already knowing your current state of play and the hour is spent on things that will add value.

THE HOUR

A working session, not a presentation

Where AI is paying off and where it is not, which kind suits which job, the controls you need first, and how to order your first processes.

AFTER

A shortlist of actions your can act on

Within a few days you get the written summary, the ranked shortlist and a recommended first engagement with an indicative cost.

What you get after the session

- ✓ **A ranked shortlist** of the processes in your organisation, ordered by likely payback and by risk
- ✓ **A one-page summary** of the session that you can pass straight to your board
- ✓ **A recommended first engagement** with an indicative cost, so you can budget for it
- ✓ **No obligation** take the shortlist and run it yourself if that suits

This is not a sales call

We do not present a product, and we do not quote on the day. What we share comes from delivery work across Australian government, health, aged care, children's services, education and transport.

PROOF**Examples of AI Agents we have already put into production****AC****Aged Care
COPILOT STUDIO**

Answers were slow and inconsistent.

We restructured the content and rebuilt the agent with stronger grounding, citations and multilingual support.

- ✓ Faster, more consistent answers
- ✓ Grounded in approved content

AS**After School Care
COPILOT STUDIO**

Directors spent much of each day answering the same questions.

We built a voice-enabled AI agent, grounded only in the client's policies, that answers first so Directors do not have to.

- ✓ Directors feed from routine calls
- ✓ Consistent answers every time

CT**Community Trans
COPILOT STUDIO**

The client matched volunteers to clients by hand, which was slow to scale.

We built a proof of concept agent in Copilot Studio that suggests ranked matches with clear reasons.

- ✓ Faster, fairer matching
- ✓ Built to scale safely

WHY CG TECH**Who you are buying from****Brisbane based,
Australia wide**

An Australian team you can meet, delivering across Australia and the Pacific.

**Right tool for the job**

We work across Microsoft, OpenAI, Anthropic, Perplexity and Open Source solutions.

**Approved government
supplier**

On Federal, State and Local Government ICT and Professional Services panels.

BEFORE YOU COMMIT**The questions we get asked****Is this a sales pitch?**

No. There is nothing to buy on the day and no quote is presented. If a piece of work makes sense afterwards, we scope it separately.

What do you need from us before the session?

The answers to five or six short questions at booking, and the right people in the room. No data access, no preparation pack.

Who should attend?

Business leaders who are serious about implementing AI & Automation into their businesses, safely and effectively.
